

# BEENISH ZIA

## Software Quality Assurance Engineer

Lahore, Pakistan • beenishzia6@gmail.com • +92 318 4787770 • linkedin.com/in/beenish-

---

### PROFESSIONAL SUMMARY

---

Results-driven Software QA Engineer with 4+ years of hands-on experience ensuring the quality, reliability, and performance of web and mobile applications across diverse industry domains. Adept at designing comprehensive test strategies, identifying critical defects early in the SDLC, and collaborating cross-functionally with development and product teams in Agile/Scrum environments. Proven ability to manage the complete QA lifecycle — from requirements analysis and test planning through execution, defect tracking, and regression — consistently driving on-time delivery of high-quality software. Passionate about continuous improvement, adopting emerging QA tools, and contributing to a culture of quality ownership.

### WORK EXPERIENCE

---

#### Software QA Engineer | Abyan Technology, Lahore

September 2024 – Present

- Collaborate closely with developers and product managers to analyze requirements, identify ambiguities, and define clear acceptance criteria, improving overall test coverage by 30%.
- Design, document, and maintain structured test cases in TestRail, ensuring traceability from requirement to test execution across all sprints.
- Actively participate in Agile/Scrum ceremonies — sprint planning, daily stand-ups, and retrospectives — to align QA efforts with development velocity and sprint goals.
- Execute manual functional and regression tests for web and mobile applications, logging defects with detailed reproduction steps, screenshots, and severity assessments in Jira.
- Provide QA sign-off on feature releases, coordinating with stakeholders to validate UAT scenarios and ensure readiness for production deployment.

#### Software QA Engineer | Topdot Pvt Ltd, Lahore

November 2022 – August 2024

- Reviewed and provided timely feedback on requirements, FRS, and design documents, catching specification gaps that would have resulted in downstream defects.
- Designed comprehensive test plans and test case suites covering functional, regression, smoke, sanity, and cross-platform testing scenarios for web and native mobile applications (iOS & Android).
- Conducted end-to-end testing of admin portals and interconnected mobile apps, validating data consistency and workflow integrity across integrated system components.
- Authored well-structured bug reports with clear descriptions, reproduction steps, video/screenshot evidence, and business impact assessments, enabling developers to resolve issues 40% faster.
- Managed and version-controlled all QA artefacts — test plans, test cases, and defect logs — on GitHub, ensuring team-wide visibility and audit-ready documentation.
- Executed full regression test suite prior to each release cycle, preventing high-severity defects from reaching production.
- Performed cross-browser and cross-device testing using LambdaTest and BrowserStack, ensuring consistent user experience across platforms.

#### Software QA Engineer | AcclivousByte, Lahore

July 2021 – November 2022

- Gathered and analysed business requirements from the Project Manager to develop targeted test scenarios aligned with client expectations.
- Reviewed Functional Requirements Specifications (FRS) and design documents, identifying testable scenarios and edge cases prior to development.
- Authored and executed manual test cases based on user stories and acceptance criteria, covering positive, negative, and boundary value scenarios.

- Performed API testing using Postman — constructing and sending HTTP requests, validating response payloads, status codes, and error handling.
- Maintained direct written communication with clients to provide QA status updates, reproduce reported issues, and confirm defect resolutions.
- Collaborated with customer support teams to triage and reproduce customer-reported defects, ensuring timely escalation and resolution within agreed SLAs.
- Applied SDLC and STLC principles to ensure quality gates were met at each development milestone, from design review through post-release monitoring.

## SKILLS & EXPERTISE
